4th INTERNATIONAL TRAINING COURSE ON SMALL SATELLITE MISSIONS
November 16 to 27, 2015

Jointly conducted by
ISRO Satellite Centre (ISAC)
ISRO, Department of Space, Government of India, Bengaluru, India
and
Indian Institute of Remote Sensing (IIIRS)
ISRO, Department of Space, Government of India, Dehradun, India

Organized by
Centre for Space Science and Technology Education in Asia and the Pacific (CSSTEAP)
(Affiliated to the United Nations)
IIIRS Campus, 4, Kalidas road, Dehradun, India
www.cssteap.org
E-mail: cssteap@iirs.gov.in
CSSTEAP Governing Board

Chairman
Mr. A.S. Kiran Kumar
India

Members
Dr. Hong Pong Gi
DPR Korea

Mr. Ali Sadegh Niayini
Iran

Dr. Thomas Djamaaluddin
Indonesia

H.E. (Mr.) Bulat S. Sarsenbayev
Kazakhstan

Prof. Abdykalykov A. Abdykalykovich
Kyrgyzstan

H.E. Ybhg Datuk Naimun Ashakli Mohammad
Malaysia

Dr. Batbold Enkhuvshin
Mongolia

Dr. Kyi Thwin
Myanmar

Mr. Kartar Singh Bhalla
Nauru

Mr. Tirtha Raj Wagle
Nepal

H.E. (Mr.) Benito B. Valeriano
Philippines

Mr. Ok-Kyu Lee
Republic of Korea

Mr. S. Panawennage
Sri Lanka

Executive Director, GISTDA
Thailand

Dr. Kamol M. Muminov
Uzbekistan

Observers
Dr. (Ms.) Simonetta Di Pippo
UN-OOSA, Austria

Prof. Dr. Ir. A. (Tom) Veldkamp
ITC (The Netherlands)

Secretary
Dr. Y.V.N. Krishna Murthy
Director CSSTEAP

Participants of 19th Governing Board meeting in ISRO Hqrs. Bengaluru
Introduction

Space technologies, especially satellites are important instruments for development and progress of humankind. Satellites are used for Earth observation, Communication, Navigation, Atmospheric studies, Astronomical observations and Military applications. Satellites provide uninterrupted services with less cost when compared with conventional methods for similar applications. It is evident from the increasing number of satellite launches in recent years. With an increase in the awareness of benefits of earth observation technology for societal applications many countries are integrating space capabilities into their national development programmes.

On one side satellites have become larger and heavier to meet increasing requirements with improved qualities, and payloads are expensive. The increase in cost, complex technology, new areas of applications and continuous service requirements restrict the satellite fabrication and launch to only a few countries or agencies in the world. On the other side the revolution in electronics miniaturization, invention of smart materials, have reduced the satellite size and mass. Further, the improvements in computation capability of processors, high capacity storage devices, imaging technology, control intelligence and onboard automation and associated performance capability have opened the opportunities to design and fabricate “Smaller, faster and cheaper” sophisticated ‘small’ satellites. The reduction in mass and volume reduces the launch cost also. The small satellite concept which provides less turnaround time, affordability and the potential to serve high end applications have attracted Industries and universities towards the small satellite fabrication and launch. The small satellites are launched as ‘piggy-backs’ of large satellites, resulting in inexpensive launch cost with more launch opportunities. More than 500 small satellites (nano, cube, micro and mini satellites) are expected to be launched in the next five years. U.S. is the most active country in small satellite deployment followed by Europe, Russia, Japan, China and India. Small satellites have attracted attention from both developed and nascent space countries in Asia for two main reasons: National security, and technology acquisition. Other Asia Pacific countries like Indonesia, Bangladesh, Vietnam, Thailand, Sri Lanka and Central Asian countries have also taken initiatives in this direction.

Objectives

- To create an awareness about small satellites, space technology and opportunities.
- To disseminate knowledge required for small satellites technology
- To sensitize professionals in developing, launching and utilizing the benefits of small satellites
- Exposure to infrastructure required for small satellite development

Who Should Attend?

The course is aimed for decision makers, senior space technologists, managers, researchers and professionals in the fields of space technology.

Others who will find the course very useful include academic institutions, space agencies, and institutions responsible for regional capacity building in the use of space-based technology.

Course Duration and Location

The course is organised by Centre for Space Science and Technology Education in Asia and the Pacific (CSSTEAP) during November 16-27, 2015 at
Indian Institute of Remote Sensing (IIRS), ISRO Dehradun and conducted, jointly by ISRO Satellite Centre (ISAC) and Indian Institute of Remote Sensing.

Language of Course

The language of the course is English. Proficiency in written and spoken English is most essential. Candidates with adequate working knowledge in English only need to apply.

Course Structure

The structure of the course is a balance between technical presentations, animation and assignments.

The following course content will be covered:
- Benefits of space technology
- Remote sensing applications
- Technology involved in making small satellites
- Applications of small satellites and future trends
- Management of small satellites

Course Implementation

The course will conducted at IIRS, located in Dehradun, India through lectures, assignments, quiz, demo, etc.

Course Fee and Accommodation

A course fee of ₹ 15,000 (equivalent to US$ 300) is applicable which includes course materials and local tours. Accommodation for the participants will be arranged in hostel at IIRS, Dehradun. In addition the participants will have to pay ₹ 50 per day toward accommodation charges.

Indian food will be available in the hostel mess/canteen managed by officer trainees on payment basis.

Fellowships to Participants

The candidates are required to send their personal details/bio-data to the Course Coordinator, IIRS, Dehradun (cssteap@iirs.gov.in) is the prescribed Application Form, appended to this Announcement Brochure. The candidates are expected to make their own arrangements for all expenses. Preference in admission will be given to the candidates who are financially supported by their organizations. A few fellowships covering to and fro international air travel, domestic travel in India and living expenses (₹ 8,000 for two weeks) in India are available, preference will be given to the fully self sponsored candidates and then to the candidates whose sponsoring organization will be bearing international to and fro travel.

Health and Insurance

Medical, life and disability insurance should be undertaken before leaving for India by the participants themselves or on their behalf by their organization for covering entire health and disability risks. No medical expenses will be borne by CSSTEAP.
About CSSTEAP (Affiliated to the United Nations)

The Centre for Space Science and Technology Education in Asia and the Pacific (CSSTEAP), was established in November 1995 in response to the UN General Assembly Resolution 45/72 of the 11th December 1990 endorsing the recommendations of UNISPACE-82, the United Nations Office for Outer Space Affairs (UN OOSA).

The centre is hosted by the Government of India with Department of Space (DOS) as the nodal agency and is guided by an International Governing Board from 16 countries and observers from two countries. The goal of the Centre is to do capacity building through in-depth education, indigenous capability in the Asia-Pacific countries for research and applications in the core disciplines of Remote Sensing & Geographic Information System, Satellite Communications, Satellite Meteorology & Global Climate, Space & Atmospheric Science and Global Navigation Satellite systems. The Post Graduate educational programs, with course curricula developed by the United Nations, are recognized by Andhra University, Visakhapatnam India for award of M.Tech degree. About 1504 professionals from 52 countries within and outside the Asia-Pacific region have graduated so far from the centre. For further details you may please visit www.cssteap.org.

CSSTEAP is organizing a 2-week Course for technologists and researchers from Asia-Pacific to share their expertise in the area of small satellites.

About Indian Space Research Organisation

Government of India had setup Space commission and Department of Space (DOS) in June 1972. Indian Space Research Organisation (ISRO) under DOS executes space programs through its establishments located at different places in India. The prime objective of ISRO is to develop space technology and its applications for the societal benefits.

ISRO has established the following five major space systems with its satellites:
- Space communication system: INSAT/GSAT Series
- Earth & Atmospheric observation system: Remote sensing satellites (ResourceSat, AWIFS, Oceansat, Metsat, Cartosat, etc)
- Regional navigation system: IRNSS satellites
- Planetary Studies system: Chandrayaan-1 and Mars Observatory Mission (MOM)
- Astronomical Research systems: Astrosat and Aditya-L1

Apart from the above, ISRO has also developed its own small satellites. Also, ISRO guides Indian University students in small satellite design, fabrication, testing and operation activities, and also launches their satellites.

Further, ISRO has developed two launch vehicles, the PSLV and GSLV to launch satellites to LEO and GEO orbits. For more details please visit www.isro.gov.in.

About Host Institutes

ISRO Satellite Centre

The ISRO Satellite Centre (ISAC) in Bengaluru is one of the centres of Indian Space Research Organisation, Department of Space and is engaged in developing satellite technology and implementation of satellite systems for scientific, technological and application missions. ISAC is functionally organized into five major areas: Mechanical Systems Area (MSA) including structures, thermal systems and spacecraft mechanisms; Digital and Communications Area (DCA)
including digital systems, computer and information, facilities, communication systems; Integration Power Area (IPA) comprising spacecraft checkout, systems integration and power systems; Controls and Mission Area (CMA) consisting of control system, mission development; Reliability and Components Area (RCA). Program Planning and Evaluation Group (PPEG) provides relevant support to the Centre. Project management teams coordinate the implementation of INSAT and IRS Projects. Space astronomy and instrumentation division is engaged in space science activities. ISRO Satellite Integration and Test Establishment (ISITE) including a comprehensive Assembly, Test and Thermovacuum Chamber (CATVAC) provides necessary support for qualification of sub-systems and systems to meet the requirements of space environment.

**Indian Institute of Remote Sensing**

The Indian Institute of Remote Sensing (IIRS) is a unit of Indian Space Research Organisation. Department of Space, Government of India which was established in 1966. It is the premier training and education institute dealing with Remote Sensing, Geoinformation Science & GNSS Technology and their applications in the region.

Institute has gained rich experience over the last 49 years in capacity building and implemented many innovative programs tuned to the needs of various target groups. The institute also offers satellite based distance learning programs for the benefit of university students.

Institute has 8 departments covering different aspects of natural resources management. Technology oriented department are (a) Remote Sensing & Photogrammetry (b) Geoinformatics and applications oriented departments are: (a) Agriculture & Soil Department (b) Forestry & Ecology Department (c) Geosciences Department (d) Marine and Atmospheric Sciences Department

APPLICATION FORM FOR
4TH INTERNATIONAL TRAINING COURSE ON
SMALL SATELLITE MISSIONS

(16th November - 27th November, 2015)
Venue: Indian Institute of Remote Sensing, Dehradun, India
Last date for receipt of application: September 30, 2015

SSM
(For office use only)

Application No.: ..............................................
Date received: ...................................................

Important:
All the correspondence from CSSTEAP (issue of admission letter, e-tickets for travel, enquiries, etc.) with the applicants will be on internet and sometimes on phones, therefore, kindly ensure that email-id, phone, fax etc. are correctly and clearly mentioned.

(Please type or use CAPITAL LETTERS)

1. Name (Dr/Mr/Mrs/Miss): ...........................................................................................................
   (As mentioned in the Passport).

2. Father’s Name: ............................................................... 3. Name of mother/ husband/ wife: .....................................................

4. Date of Birth (DD/MM/YYYY): ........................................... 5. Place of Birth: .................................................................

6. Gender (Male/Female): ...................................................... 7. Nationality: ....................................................................

8. Contact Information: Present official Address (Valid until what date):
   ..............................................................................................................

   Contact number: (Please give complete Phone No. with country, city codes)
   Office (Tel): ................................................................. Office (Fax): ..........................................................
   Mobile: ............................................................................ E-mail: ..............................................................

9. Permanent home Address (in your country):
   ..............................................................................................................

   Contact number: (Please give complete Phone No. with country, city codes)
   Home (Tel): ................................................................. Home (Fax): ..........................................................
   E-Mail (alternate, preferably G-mail or Yahoo): ..........................................................

10. Nearest International airport (Specify the place/city): ...........................................................

Important:
a) Interested persons may detach last 4 pages from this brochure and use them as Application Form.
b) It is essential that full passport details are mentioned in the Application Form.
c) Application Forms without passport details may not be considered.
d) Providing alternate email-id would ensure timely communication with applicants.
e) For faster communication with the applicants CSSTEAP Secretariate will be using your email-id for all purposes (e.g. admission letter, air tickets and logistic arrangements).
11. ACADEMIC QUALIFICATIONS* (mandatory)

<table>
<thead>
<tr>
<th>Degree / (Bachelor/ Master) Diploma</th>
<th>Duration of Course (mention from which year to year)</th>
<th>University / Institution</th>
<th>Year of Passing</th>
<th>Grade / percentage/ CGPA</th>
<th>Major Subjects/specialization</th>
</tr>

</tbody>
</table>

*(Enclose copies of Degree/Diploma/Certificates/marks/grades obtained etc. and their certified transcription in English)*

Major Subject in last examination: .................................................... Area of Specialization: ..........................................................

Medium of Instruction/Language: .................................................... TOEFL Score (Proficiency in English): ..........................................

Reading: Fair, Good, Very Good
Writing: Fair, Good, Very Good (Please tick the option)
Spoken: Fair, Good, Very Good

Please enclose certified copies of marks/grades of degree, diploma, TOEFL (validity period), etc. certificates and their certified translations in English.

12. DETAILS OF EXPERIENCE OF LAST FIVE YEARS

(a) Present Position ................................................................. Present Responsibilities*: ..........................................................

Organization and Complete Address

Date of joining this Organization (dd/mm/year) ..................................

* Attach additional sheets giving details of your technical activity during last one year.

(b) Experience during past 15 years:

<table>
<thead>
<tr>
<th>Name of Organization(s)</th>
<th>Position(s) / Post(s) held</th>
<th>Nature of work done</th>
<th>Duration</th>

</tbody>
</table>
13. (a) Activities & Projects in which your present organization is engaged (mandatory) and nature of your duties:

(b) Main Scientific/Technical facilities available in your organization *(Including approximate number and type of computers, type of software available etc.)*:

* If required attach separate sheet.

14. Have you done any other course (short or PG) from CSSTEAP *(If ‘yes’, please give details including theme & year)*:

15. How this short course on Small Satellite Mission will help you in your work/organization? Please describe below:

16. DETAILS OF PASSPORT: Passport details are essential for selection of candidates and send copy of the passport wherever available.

<table>
<thead>
<tr>
<th>Passport Number</th>
<th>Place of Issue (City and country)</th>
<th>Date of Issue</th>
<th>Passport valid up to</th>
<th>Issuing Authority</th>
<th>Whether previously visited India if so place and date of last visit</th>
</tr>
</thead>
<tbody>
<tr>

17. Physical Fitness
   a) Are you suffering from any recurring/chronic/serious communicable disease which may affect your study program in India? 
      Yes / No

   b) If yes, please specify nature of illness (Candidates are advised to attach medical fitness certificate from a government hospital or government-recognized hospital on hospital letterhead).

18. How do you propose to meet the international travel and stay expenses in India? *(Preference will be given to those who will make their own travel arrangement)*:

19. DECLARATION BY THE CANDIDATE:

   I have read the announcement brochure and will abide by the rules and regulations of the Centre. I have made / am making / have not made travel arrangements for attending the course and local expenses for the period of stay in India.

   Date: ....................................
   Place: ....................................
   Signature of Candidate:
20. SPONSORING / NOMINATING AGENCY CERTIFICATE

Dr/Mr/Ms. ..............................................................................................................................................(name of ministry, department, organisation etc.) to attend the International Training Course on ‘International Training Course on Small Satellite Missions’ to be held at Institute of Remote Sensing, Dehradun, India during 16th-27th November, 2015. We envisage to utilize his/her experience in specific tasks of our organization/agency. Following statements are mandatory for certification by the sponsor.

i. She will not be provided international travel support.

ii. She will not be provided financial assistance for the period of stay in India.

iii. She possesses adequate knowledge of English Language required for the course.

Date: ...................................................... Signature: .................................................................

Place: ...................................................... Name in Capital Letters: ...........................................

Designation: .................................................. Phone No.: ....................................................

Fax No.: ...................................................... E-mail: ..............................................................

(Official seal of the sponsoring or nominating authority)

Note: Application without official seal of sponsoring or nominating authority and their details will not be considered.

21. FORWARDING NOTE BY THE RESPECTIVE INDIAN EMBASSY IN YOUR COUNTRY

This is to forward the application of Dr/Mr/Ms. ............................................................................... of ...............................................................................................................................(Specify the Country Name here) for the “Small Satellite Missions” to be held at Institute of Remote Sensing, Dehradun, India during 16th - 27th November, 2015.

Date: ...................................................... Signature: .................................................................

Place: ...................................................... Name: .................................................................

Designation: .................................................. Phone No.: ....................................................

Fax No.: ...................................................... E-mail: ..............................................................

(Official seal of the Embassy/High Commission)

Note: Application without official seal of Embassy or High Commission will not be considered.

N.B. Please send an advance copy of the application form duly signed by the sponsoring agency to the Course Coordinator, CSSTEAP, IIRS Campus, 4, Kalidas Road, Dehradun-248001, India by fax (+91-135-274-0785) for quick processing. Original copy needs to be sent through Embassy/High commission of respective country at New Delhi duly signed by the sponsoring or nominating authority.

- The application which is not complete in all respects is likely to be rejected.
- Candidate must attach copies of certificates of the following:
  
  (a) Medical fitness to attend the course, including Chest X-ray (PA), Blood Test (including Random Blood Sugar, HIV, HBs, Ag), Urine complete.  
      (In case if any medical information requiring attention is hidden and if found during the course, the centre will be compelled to send the candidate back home on their own cost.)
  
  (b) Smoking and consuming alcoholic drinks in class room and office campus is prohibited.
  
  (c) Highest degree obtained (degree certificate and mark sheet/grade card)
  
  (d) Proof of proficiency in English.
  
  (e) All Degree Certificates, if not in English, may please be translated in English and attested by the Head of the organization or transcript in English can also be submitted.
  
  (f) Expecting mothers can make judicious decision before joining the course.
About Dehradun

Dehradun, the capital of newly formed Uttarakhand state, is located in one of the outer valleys of Himalaya in Northern India. The valley is surrounded by dense forest and provides pristine environment for academic pursuits. World famous Rajaji National Park, famous for Tigers, Elephants etc. is located adjacent to the city. Dehradun is well connected by air, train and road from Delhi, the national capital. IIRS campus is about 6 km from railway station and about 25 km from airport. Many important national organizations/institutions are located here. Mussoorie, the famous hill station, is about 30 km from Dehradun. Haridwar and Rishikesh, the two famous pilgrim centers, are about 55 km and 40 km, respectively from Dehradun. Weather of Dehradun during November is usually pleasant to moderately cold.
